Executive Summary

Project Name	Solaverse
Overview	<p>Solaverse is an AI-powered metaverse built on the Solana blockchain, featuring dynamic, player-driven gameplay and real-world-inspired virtual zones. It uses advanced AI for personalized quests and evolving experiences. The platform incorporates an NFT-based economy and aims to support cross-chain interoperability. Governance is decentralized via a DAO, allowing players to influence development decisions. Its native token, SOLA, has a total supply of 2.9 billion, with 15% allocated to presale.</p>
Token Type	SPL 2022 - utility token
Project Website	https://solaverse.ai/
Timeline	6th May 2025
Method	Manual Review
Audit Scope	<p>The scope of this audit was to analyse the Solaverse SPL Token Address for quality, security, and correctness.</p> <p>https://explorer.solana.com/address/soLAU6XWJRx1T5gpf8RiEaKmeP6KZAMN7Yx7EGuAVs9/token-extensions</p>

Manual Review Analysis

1. Contract Address(Mainnet):

<https://explorer.solana.com/address/soLAU6XWJRx1T5gpf8RiEaKmeP6KZAMN7Yx7EGuAVs9>

Mint Authority: Our technical team has successfully checked that the mint authority is for the specified contract address(soLAU6XWJRx1T5gpf8RiEaKmeP6KZAMN7Yx7EGuAVs9). Other than this specified address, no one can mint the Tokens.

2. Update Authority:

The Program included functionality to update metadata. The update authority refers to the entity authorised to modify the metadata associated with a token mint. This metadata typically includes details such as the token's name, symbol, URI, and any additional attributes. In this program ID, Update Authority is with: 8Hvui9AVJwRpQ7bMgUubgQRWo3b3HTuMvBPC4r614UG4.

3. Decimal Specification:

Our technical team has successfully checked that the decimals have been set to the exact value specified, i.e. 9. This precision ensures that the token can be traded and utilised as intended, providing a seamless experience for users.

4. Solscan Proof:

To further validate the information provided, we have attached a Solscan proof that confirms the mint authority, Freeze authority is with the specified address, decimal specification and Token Distribution plan. This proof serves as an additional layer of assurance for you and your stakeholders.

Token-2022 Mint Refresh

Address	soLAU6XWJRx1T5gpf8RiEaKmeP6KZAMN7Yx7EGuAVs9
Fixed Supply	2,900,000,000
Decimals	9
Extensions	metadataPointer tokenMetadata

The token is working as intended with the following things:

- ✓ mint/freeze authority is with specified Address
- ✓ decimals are correct (9 Decimal)
- ✓ Fixed Supply: 2,900,000,000
- ✓ Total Supply: 2,900,000,000

Closing Summary

In this report, our team has worked diligently to ensure that your requirements are met.

Disclaimer

At QuillAudits, we have spent years helping projects strengthen their smart contract security. However, security is not a one-time event—threats evolve, and so do attack vectors. Our audit provides a security assessment based on the best industry practices at the time of review, identifying known vulnerabilities in the received smart contract source code.

This report does not serve as a security guarantee, investment advice, or an endorsement of any platform. It reflects our findings based on the provided code at the time of analysis and may no longer be relevant after any modifications. The presence of an audit does not imply that the contract is free of vulnerabilities or fully secure.

While we have conducted a thorough review, security is an ongoing process. We strongly recommend multiple independent audits, continuous monitoring, and a public bug bounty program to enhance resilience against emerging threats.

Stay proactive. Stay secure

About QuillAudits

QuillAudits is a leading name in Web3 security, offering top-notch solutions to safeguard projects across DeFi, GameFi, NFT gaming, and all blockchain layers. With six years of expertise, we've secured over 1000 projects globally, averting over \$30 billion in losses. Our specialists rigorously audit smart contracts and ensure DApp safety on major platforms like Ethereum, BSC, Arbitrum, Algorand, Tron, Polygon, Polkadot, Fantom, NEAR, Solana, and others, guaranteeing your project's security with cutting-edge practices.
