belp

Table of Content

Executive Summary

Project Name	Belp
Project URL	https://belpy.xyz/
Overview	BELP is a Web3-native project inspired by successful community-centric brands like Pudgy Penguins (PENGU) and Abstract. At its heart lies a unique IP: Belpy. Born on the Solana network, BELP is not just a digital collectible series, but a brand that represents creativity, freedom, and community in the new digital era.
	Belp SPL Tokens: Belp SPL token is the fuel and cultural currency of the Belpy ecosystem. BELP is a meme coin with real-world impact and community empowerment.
Audit Scope	The scope of this audit was to analyse the Belp SPL Token Address for quality, security, and correctness.
	https://solscan.io/token/ BhxemLZk5jFAQKwJYdioP2JwMXKLxh8qr29mvh5JskaC#met adata
Method	Manual Review.
Timeline	24th September 2025

Manual Review Analysis

Token Details:

Name: BELP
Symbol: BELP
Decimals: 6
Current Supply: 10,000,000,000

Contract Address:

https://solscan.io/token/
BhxemLZk5jFAQKwJYdioP2JwMXKLxh8qr29mvh5JskaC#metadata

Mint Authority:

Our technical team has successfully checked that the mint authority is disabled for the specified contract address. This ensures that no additional tokens can be minted, providing stability and security for the token holders.

Decimal Specification:

Our technical team has successfully checked that the decimals have been set to the exact value specified, i.e. 6. This precision ensures that the token can be traded and utilized as intended, providing a seamless experience for users.

Freeze authority active :

The update authority wallet can freeze token accounts, restricting transfers.
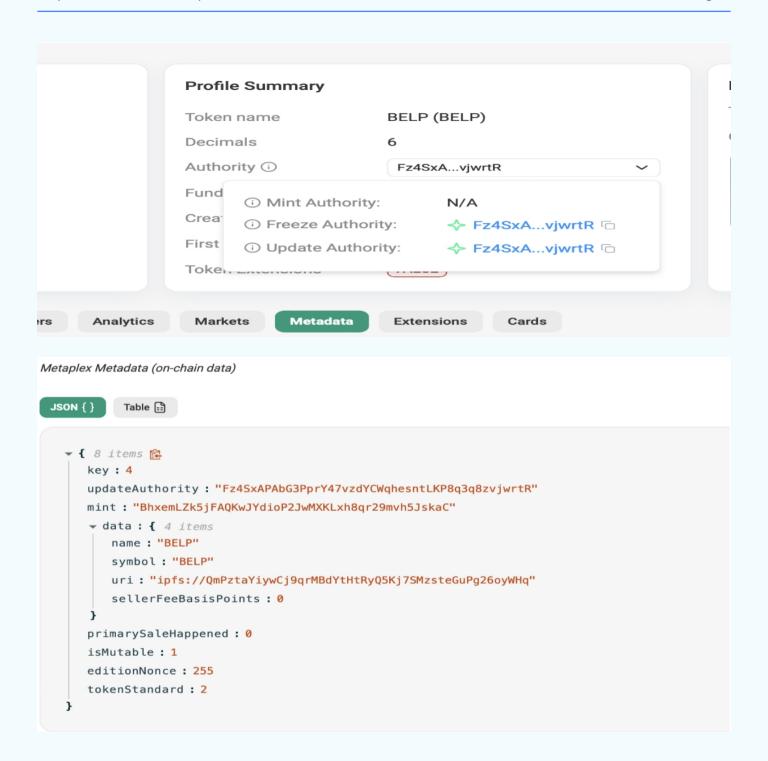

Metadata mutable :

Token branding (name, symbol, metadata URI) can still be altered by update authority.

Solscan Proof:

To further validate the information provided, we have attached a Solscan proof that confirms the mint authority disablement and decimal specification. This proof serves as an additional layer of assurance for you and your stakeholders.

Profile Summary

}
```

Recommendations

- Freeze Authority: Disable if decentralization and trust are a goal; otherwise, disclose clearly in documentation.

- Update Authority: Renounce if the project wants fully immutable branding.

- Liquidity (LP tokens) not locked.

Closing Summary

The token is working as intended with the following things:

✔ **Mint authority is Disabled (renounced, no new supply possible)**

✔ **Decimals are correct (6 decimals)**

✔ **Current Supply: 10,000,000,000**

⚠ **Freeze authority is with Fz4SxAPAbG3PprY47vzdYCWqhesntLKP8q3q8zvjwrtR (centralized control remains)**

⚠ **Metadata is Mutable — update authority can change token branding with Fz4SxAPAbG3PprY47vzdYCWqhesntLKP8q3q8zvjwrtR (centralized control remains)**

Disclaimer

At QuillAudits, we have spent years helping projects strengthen their smart contract security. However, security is not a one-time event—threats evolve, and so do attack vectors. Our audit provides a security assessment based on the best industry practices at the time of review, identifying known vulnerabilities in the received smart contract source code.

This report does not serve as a security guarantee, investment advice, or an endorsement of any platform. It reflects our findings based on the provided code at the time of analysis and may no longer be relevant after any modifications. The presence of an audit does not imply that the contract is free of vulnerabilities or fully secure.

While we have conducted a thorough review, security is an ongoing process. We strongly recommend multiple independent audits, continuous monitoring, and a public bug bounty program to enhance resilience against emerging threats.

Stay proactive. Stay secure.

About QuillAudits

QuillAudits is a leading name in Web3 security, offering top-notch solutions to safeguard projects across DeFi, GameFi, NFT gaming, and all blockchain layers. With seven years of expertise, we've secured over 1400 projects globally, averting over $3 billion in losses. Our specialists rigorously audit smart contracts and ensure DApp safety on major platforms like Ethereum, BSC, Arbitrum, Algorand, Tron, Polygon, Polkadot, Fantom, NEAR, Solana, and others, guaranteeing your project's security with cutting-edge practices.
